millions of children are dying each year with preventable and reversible critical illness including circulatory shock and respiratory failure according to the world health organization in 2015 the under five mortality rate in low income countries was 76 deaths per 1000 live births about 11 times the average rate in high income countries 7 deaths per 1000 live births there is limited data about the nature of the delivery of critical care in resource limited regions the care of critically ill children in low resource settings is challenging contributing factors include limitations in the existing infrastructure lack of resources and low numbers of appropriately trained healthcare workers meeting these challenges requires clinical evidence pertinent to the local settings adequate number of well trained personnel quality improvement activities and the ongoing development of preventative measures in addition approaches to prevent worsening critical illness in at risk hospitalized patients are needed we are presenting 15 state of the art manuscripts from international experts from all settings involved in the care of critically ill children in resource limited settings this collection of manuscripts covers topics including education research clinical experience and infectious diseases we hope that we are providing a window into the future of critical care delivery for all children around the world

the development of information processing systems requires models calculi and theories for the analysis of computations it is well understood by now that more complex software systems cannot and should not be constructed in one step a careful systematic and disciplined structuring of the development process is most adequate it should start from basic requirement specifications in which all the relevant details of the problem to be solved are formalized the envisaged solution should be developed step by step by adding more and more details and giving evidence in the best case by formal proof to show the correctness of the developed steps the development ends if a description of a solution is obtained that has all the required properties the summer school in marktoberdorf 1992 showed significant approaches in this area to refinement calculi to models of computation and as a special issue to the treatment of reactive timed systems like in the many summer schools before the success of the 1992 summer school was not only due to the excellent lectures but even more due to the brilliant students taking part in the

discussions at the summer school the exchange of different views and the recognition of the similarity of a number of different view points these were some of the most important contributions of the summer school fu the following the proceedings of the summer school are collected they show the maturity of the field in an impressive way
